Item # ARPAC 708HB, Right-Angle Intermittent Motion Shrink Bundler

Right-Angle Intermittent Motion Shrink Bundler

The right-angle intermittent motion ARPAC 708HB SERIES shrink bundler is designed specifically for today's pharmaceutical, health and beauty industry. Ultra-compact in design and economical in price, the 708HB SERIES is capable of shrink wrapping up to 25 bundles per minute, depending on product specifications. For faster output, this system is available with dual lanes to run up to 50 bundles per minute.

Constructed of stainless steel, the 708HB SERIES frame is designed for clean operating environments.

Its telescoping tunnel conveyor is designed for fast change of product dead plates and for even transfer of small product from dead plate into the tunnel.

The 708HB SERIES handles a variety of multipack configurations thanks to multi row collation capabilities and offers a wide range of standard and customized infeeds.
