

Item # Pro-Series LP, Low Profile Cost-Effective Semi-Automatic Stretch Wrapper

Low Profile Cost-Effective Semi-Automatic Stretch Wrapper

The new PRO-SERIES® enjoys the reputation of being one of the most cost-effective semi-automatic machines on the market today. A new ergonomic sturdy design, with chains enclosed in the tower frame, ensures safer operation. Standard features include: illuminated adjustable (0-7) LED top & bottom wrap counters, top overwrap control, anti-static film rollers, cycle pause, variable speed controls for both turntable and carriage, upgraded photo eye to see most dark loads, plus EZ-LOAD Powered Pre-Stretch, maximizing stretch film usage.

The PRO-SERIES® is often purchased with the WRAP-N-WEIGH® feature that combines wrapping and weighing operations. A precision scale and digital controls are integrated into the machine which brings greater economy and efficiency to any wrapping operation requiring weighing.

This 4,000 lb. capacity system is available with a high profile turntable for forklift loading, or low profile turntable for pallet-jack loading.

The PRO-SERIES® can be customized to suit your material handling requirements with extended towers for taller loads and split frames for odd-sized larger loads.

The PRO-SERIES® is part of a robust line of stretch wrapping equipment designed to maximize stretch film usage while ensuring the very best load unitization. All ARPACSTRETCH™ equipment is constructed with heavy-duty reinforced structural steel, and finished with non-corrosive Steel-It paint, to guarantee years of reliable wrapping. The PRO-SERIES® is manufactured in the USA and sold through our nationwide distributor network.

FEATURES

- Welded heavy-duty reinforced structural steel construction for around-the-clock operation
- Steel-It paint provides a durable scratch resistant surface and prevents corrosion
- Forklift portable
- 4 point caster support for HP turntable
- 6 pairs - Delrin caster support for LP turntable
- Turntable direct drive: 1/2 HP, 90 VDC motor with ANSI 50 chain
- Micro controller logic
- Top over-wrap control feature (TOC)
- Cycle pause control
- Turntable jog control
- Carriage pause control (banding)
- Adjustable dual LED wrap counters (0-7)
- Corner compensation
- Anti-static rollers
- UL approved components
- External fuses
- Positive home position alignment

- Photo electric load height sensor that detects most dark colored loads
- EZ-LOAD Powered Pre-Stretch 150-300%, 200% Standard
- Variable carriage speed (0-21 FPM)
- Turntable speed of 0-12 RPM adjustable
- Carriage drive: 1/3 HP, 90 VDC motor with ANSI chain lift drive
