

A new Generation of Pressure Washer Hoses

Pressure Flex “Armadillo” Series Hose

Pressure-Flex “Armadillo” Series Hose has been engineered to withstand high abrasion, high operating temperatures, and various oils, chemicals, and soaps. This highly flexible hose offers working pressures as high as 5,800 PSI. A special braid design provides 20% better bend radius, longer flex/impulse life, than conventional lighter weight pressure washer hose. The cover is highly oil resistant for longer life in the field, and includes a non-slip fabric impression finish. This unique impression finish cover provides excellent adhesion, coupling retention, flexibility, and is 30% more abrasion resistant in its class.

Construction:	NBR-Nitrile blend Class A ORS for various soaps, oils, and chemicals.
Reinforcement:	Steel two wire braid.
Cover:	Special black synthetic high abrasion compound - Class A ORS.
Branding:	-40°F. to 250°F. 275°F. intermittent.

Working Pressures
