

Series 2090

Hydrocarbon Drain Hose

Series 2090 is designed to evacuate hot, liquefied residue from steam cleaning operations. The high temperature, oil-resistant tube and cover withstand attack by steam vapors and petroleum-based runoff. The wire braid reinforcement provides crush-resistant durability, kink resistance and a path to conduct a static electrical charge to ground. **NOTE: Do not use for steam service.**

Tube:	Black Nitrile (ARPM Class A ORS)
Reinforcement:	High tensile wire braid
Cover:	Tan CPE
Temperature:	-40°F to +300°F (-40°C to +150°C)
Branding:	Embossed
Packaging:	500'/Reel - Max 3 pieces - Lengths in 50' increments
Origin:	USA
