

Custom Printed Decals and Stickers

Interstate Graphics specializes in designing and manufacturing custom decals that can be displayed on cars, equipment, trucks, as well as machinery. Special displays that we have custom fabricated in the past include doomed, double sided, transparent, and reflective decals. We can print decals with your custom graphics using UV inks that are resistant to abrasion and chemicals. Typically, our container, recycling, or vehicle decals are optimized for outdoor use and last for 2 to 5 years. Lamination or UV coatings can further increase the life expectancy of these decals.

Our screen-printed or digitally printed decals are available in a variety of materials such as lexan polycarbonate, pressure sensitive vinyl, and polyester. Depending on their exposure to moisture, sunlight, or other factors, our expert staff provides complete assistance in fabricating the right decals for your applications. With in-house die cutting plus CNC routing capabilities, we can manufacture decals in square, rectangle, oval, or any other custom shape and size. Custom decals can also be offered with adhesive or static cling backing for quick and easy installation.
