## 800-374-2739

### Promalt

**Notes:**

The recommended dose rate of Promalt 295 is dependant on the grist content. For poor quality malts 0.025-0.05% (based on weight of malt in the mash) is recommended, while for high levels of adjuncts the dose rate may vary between 0.05- 0.2% . For use with barley dose rate between 0.1-0.5% (based on weight of barley in the mash)

Pack size	Application rate
