

BOOSTER BLANC

For smoothing mid-palate intensity and fresh aromas in white & rosé wines

CHARACTERISTICS

Booster Blanc is a natural inactivated yeast product from the ICV range of selected yeast. It has been specifically designed to smooth mid-palate intensity and enhance fresh aromas in whites and rosés. Booster Blanc can increase the perception of volume and decrease sensations of acid aggressiveness in whites and rosés. It can also reduce the perception of acid aroma and limit ethereal, chemical and burning perceptions in the mouth, particularly in wines made from botrytized grapes. Booster Blanc is a Natural Yeast Derived Nutrient that can supply certain fermentative advantages together with significant wine quality improvement. Used alone, it should not be viewed as a substitute for DAP or other fermentative nutrients.

Impact of Booster Blanc on the sensory profile of a white wine from Grenache Blanc fermented with an ICV yeast strain.

ICV R&D department trial, 2004.

RECOMMENDED DOSAGE

30 g/hL (2.5 lb/1000 gal)

DIRECTIONS FOR USE

Dissolve Booster Blanc in 10 times its volume in must or water. If adding to the must, distribute into the tank as it is filling or during a pump-over. Booster Blanc can also be added directly to the crusher. If adding towards the end of fermentation, add during a pump-over or during tank agitations/mixings. This product is partially soluble and should be checked for proper re-suspension before being added to the juice or wine.

PACKAGING AND STORAGE

Booster Blanc is packaged in 2.5 kg heat-sealed bags. Un-opened, Booster Blanc has a shelf-life of 3 years. It should be stored in a cool, dry place.
