

Patent **TARG-it Vision™**

- Exclusive patent computer based camera and software system designed and manufactured by Ag-Tronic Control Systems to determine the optimum label placement on the individual products thereby avoiding placement of labels on leaves and stems.
- Available with the **ORB-it®** Vision-Labeler™ and **ORB-it®** Over-Top™.

Accu-Label's custom designed software is developed in-house and offers the following benefits:

- Easy operator set-up and use with touch screen interface
- Optional storage of production information and reports
